

Filip Ivanovic

Full-stack Blockchain Developer

Full-stack blockchain developer with 5+ years of experience building real-world apps across Web2 and Web3. Passionate about solving open-ended problems and writing clean, maintainable code.

Main skills and years of experience

- **Front-end:** React (6y), Vue (4y), TypeScript (5y), Three.js (1y)
- **Back-end:** PHP (6y), Node.js (4y), Java (2y), MySQL (6y), Laravel (1y)
- **Smart Contracts:** Solidity (5y), Web3.js (3y), Ethers.js (2y)

Employment

- Front-End Developer, Styliff Inc. · React, TypeScript, Three.js · Mar 21 – Sep 22

Worked on Sphere, a 3D web UI tool for e-commerce, as part of a mid-size front-end team. Built features for grid clustering and object alignment, contributed to various UI functionalities and bug fixes. Collaborated in a structured Agile setup with PR reviews, PMs, and Jira.

- Full-Stack Blockchain Developer, Swapsicle Inc. · Solidity, React, Node.js · Nov 23 – May 25

Contributed to the Swapsicle DeFi platform and led development of Ezcrow, a P2P crypto trading system. Also worked on DAOsicle/Predicted, a governance dashboard for investors and DAO stakeholders. Handled both smart contract development and full-stack features across multiple Web3 products.
