Filip Ivanovic

Full-stack blockchain developer

I love working with complex and open-ended apps. Currently, I'm mostly interested working with 3D and blockchain development. I'll always work to produce clean and easy to read code.

Main skills and years of experience:
Front-end:
- React 5 years;
- Vue 4 years;
- Typescript 2 years;
- Three.js 1 year;

Back-end:
- PHP 5 years;
- Java 2 years;
- MySQL 4 years;
- Laravel 1 year;

Smart-contracts:
- Solidity 3 years;
- Web3 3 years;
- Ethers;

Previous projects:
[WebToPrint - Private full-stack company management software (full-stack)](#)
[Robinos - Online DeFi sports betting games (blockchain)](#)
[Sphere and Sphere Curator – 3D webshop UI tools for building personalized spheres (front-end)](#)
[Fast Edge Demo – demo online developer tools (front-end)](#)
[FUSD – Telos Foundation stable coin (blockchain)](#)
[Ezcrow – P2P trading platform (full-stack + blockchain)](#)
