

Filip Ivanovic

Full-Stack Engineer

Full-Stack Engineer with 6+ years of experience delivering production web applications and scalable backend systems. Trusted to take ownership of complex tasks and see them through to completion with a strong focus on quality and reliability. Uses AI-accelerated development workflows to significantly improve development speed without sacrificing engineering quality.

Technical Expertise

- **Front-End:** React (6y), Vue (5y), TypeScript (5y), Three.js (2y)
- **Mobile:** React Native / Expo (current) , Kotlin (current)
- **Back-End:** PHP / Laravel (6y), NestJS / Node.js (4y), Java (2y), .NET / ASP.NET (current)
- **Smart Contracts:** Solidity (5y), Web3.js (3y), Ethers.js (2y)
- **Databases:** MySQL (6y), PostgreSQL (4y)
- **Tools:** Git, VS Code, Visual Studio, GitHub Copilot, Claude Code

Employment History

- **Full-Stack Developer, Indigo Labs** · *.NET, React, Typescript* · Mar 26 – Present

Developing client applications within a software development agency environment. Currently building a full-stack and mobile application for a local startup, pitching for a second round of funding from a large VC and signing up first business clients.

- **Lead Full-Stack Blockchain Developer, Swapsicle Inc.** · *Solidity, React, Node.js* · Nov 23 – May 25

Built and shipped multiple production Web3 products, including a P2P trading system and DAO governance dashboards, handling smart contracts, UI and APIs across live DeFi systems with real users and capital at risk. Led a small team of front-end and blockchain engineers.

- **Front-End Developer, Styliff Inc.** · *React, TypeScript, Three.js* · Mar 21 – Sep 22

Owned core 3D layout and alignment systems in a production B2B e-commerce software used by enterprise clients. Worked closely with QA and designers to stabilize complex interactions and improve long-term maintainability. Collaborated in a structured Agile setup with PR reviews, PMs, and Jira.

- **Freelance / Independent Developer** · Jan 21 – Present

Built and maintained full-stack web applications for various clients, owning development from architecture and implementation to deployment and maintenance.
